Tristraum is the production team originally from San Francisco that started Twitch Remix Service. Twitch released over 25 remix albums geared towards underground djs in the mid 90s. Remixes included work for The Prodigy, Celebrate the Nun, Anything Box, The Messiah, Future Sound of London, The Orb and Front 242 to name a few.

Tristraum has teamed-up with vocalist Krystyna Eller to record Shiver.

Shiver's selection of genre-crossing remixes including heavier synth-pop, darkwave, and trance influences will fit most any dance floor mood. While this release will surely be a hit with DJs, it would not be out of place in anyone else's collection either.
